Subject: Field Trip Report (Encana Oil and Gas USA, Inc. - Moneta Divide Area)

NR

We traveled to the Marlin 29-21 well. When you look at the pictures you will notice that the area is open. There were antelope and domestic animals in the area. Note: The Marlin Well and pipeline can be observed in picture nos. P6190117 thru P6190132.

A more detailed summary from the tour is presented below. Let me know if you would like to discuss further.

FULL REVIEW OF MONETA DIVIDE FIELD TOUR (optional review)

NR

- Marlin Well – All interested participants were transported to the Marlin well. The drive was approximately 30 minutes from the highway each way. The area that we traveled through was isolated with the exception of antelope and cows. The operators allowed us to step off the bus to see the well and offered to answer questions. I believe we may have passed one or two other wells on our way to the location.

Note: The Marlin Well and pipeline can be observed in picture nos. P6190117 thru P6190132
